

Credit Name: CSE 2120 Data Structures 1

Assignment Name: EvenAndOdds

Error Log Entry

What error message did you encounter (if any)?

While creating the EvenAndOdds application, I did not encounter an error message but my Even numbers were displaying on the same line as the Odds numbers.

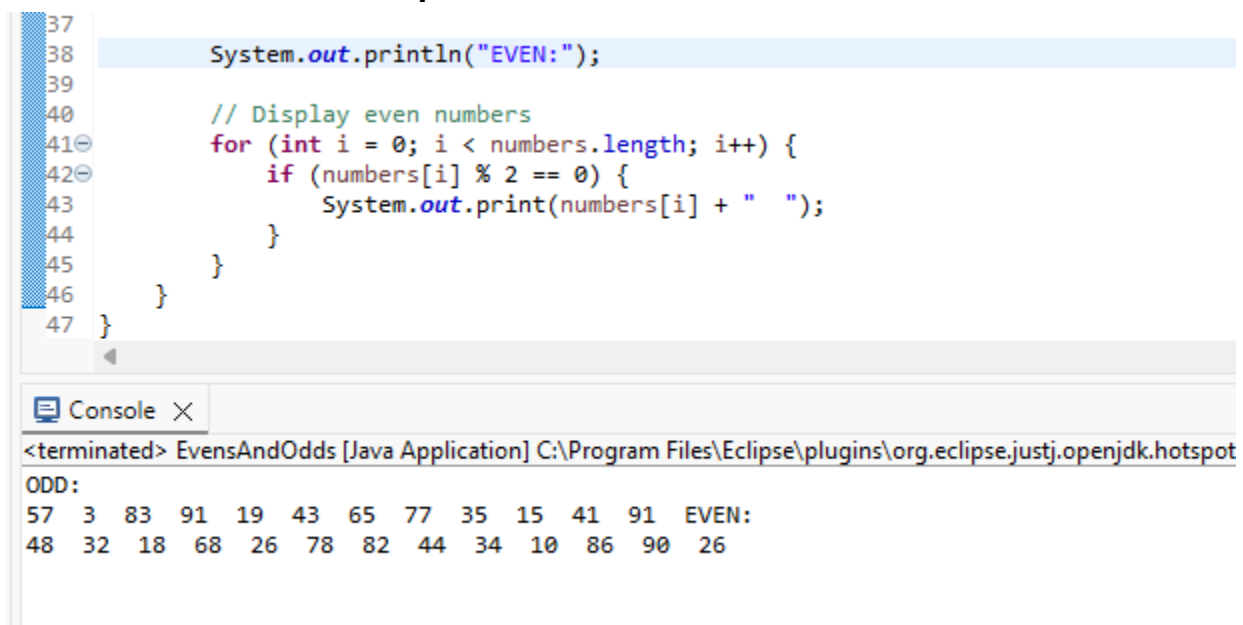

What unexpected behavior did your program exhibit?

An unexpected behavior my program had was that when I was trying to display the Odds and Even numbers, the Odd numbers would display easily but the Even numbers would not as they were displaying on the same line.

What caused the issue? (e.g., syntax error, logic error, incorrect function usage, etc.)

The issue that caused this error is a logic error. This is because my `System.out.println` was displaying both the Even numbers and the Odds numbers on the same line. This made it confusing to tell apart the Odd numbers and Even numbers and it didn't make it to nice

Include a screenshot of specific lines of code.

The screenshot shows the Eclipse IDE with a Java file open. The code is as follows:

```
37
38 System.out.println("EVEN:");
39
40 // Display even numbers
41 for (int i = 0; i < numbers.length; i++) {
42     if (numbers[i] % 2 == 0) {
43         System.out.print(numbers[i] + " ");
44     }
45 }
46 }
47 }
```

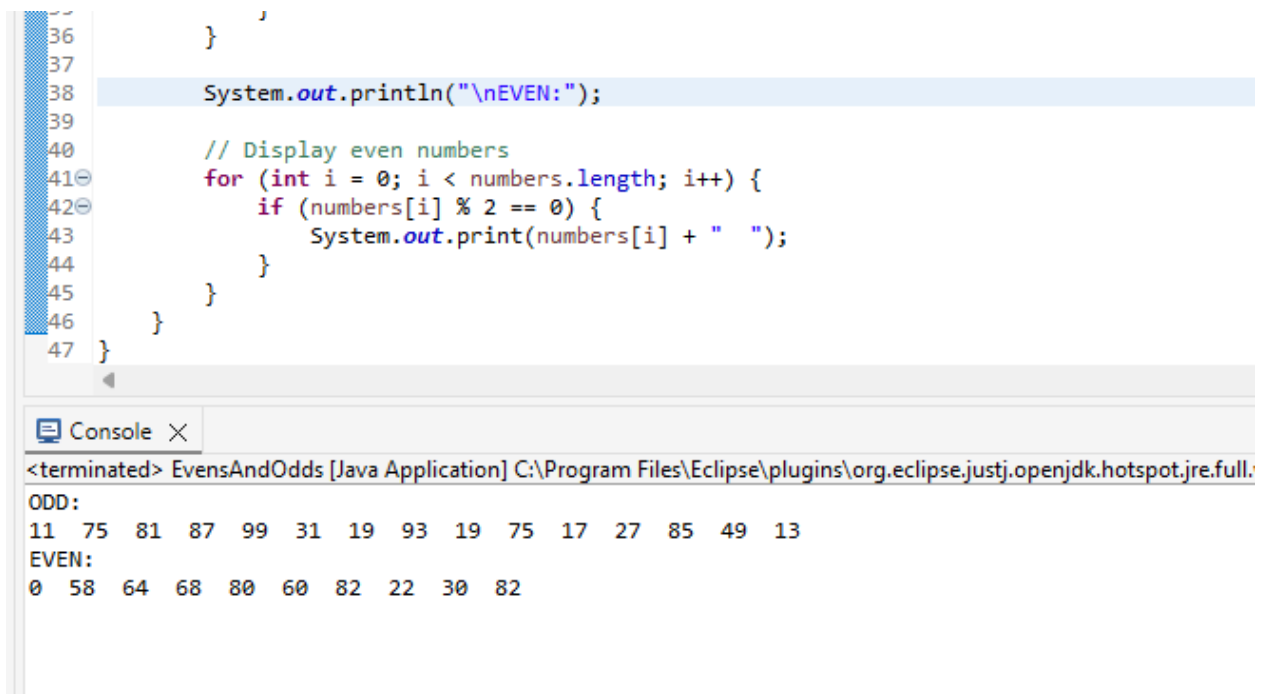

Below the code editor is the Console window. It shows the output of the program:

```
<terminated> EvensAndOdds [Java Application] C:\Program Files\Eclipse\plugins\org.eclipse.justj.openjdk.hotspot
ODD:
57 3 83 91 19 43 65 77 35 15 41 91 EVEN:
48 32 18 68 26 78 82 44 34 10 86 90 26
```

How did you fix the issue?

I was able to fix the issue by adding the `System.out.println("\n Even")` to make the Even numbers go below the odd numbers. The `\n` is called an escape sequence and it adds a new line.

Provide the corrected code or solution using a screenshot.

The screenshot displays the Eclipse IDE interface. The top pane shows a Java source file with the following code:

```
36     }  
37  
38     System.out.println("\nEVEN:");  
39  
40     // Display even numbers  
41     for (int i = 0; i < numbers.length; i++) {  
42         if (numbers[i] % 2 == 0) {  
43             System.out.print(numbers[i] + " ");  
44         }  
45     }  
46 }  
47 }
```

The bottom pane is the Console, titled "Console X". It shows the output of the program:

```
<terminated> EvensAndOdds [Java Application] C:\Program Files\Eclipse\plugins\org.eclipse.justj.openjdk.hotspot.jre.full:  
ODD:  
11 75 81 87 99 31 19 93 19 75 17 27 85 49 13  
EVEN:  
0 58 64 68 80 60 82 22 30 82
```
